

German-Russian Summer School

SMART ELECTRICITY AND ENGINEERING

19.-31.08.2019

# German-Russian Summer School 2019

The Summer School offers the opportunity to visit companies, participate in excursions, project work and lectures together with students from the Ural Federal University (UrFU) Yekaterinburg on topics such as smart grid, smart cities, electromobility, digital transformation, energy efficiency and renewable energies. The program also involves a two-day excursion to Berlin including a meeting with the German Federal President in Berlin.

Applications are open until 30 July 2019 to advanced Master's students in engineering, technology, natural sciences and other energy-related subjects.

Participation in the English Summer School is free of charge.
